The exponent of 13 on the factorisation of  $1000!$  is  $\lfloor \frac{1000}{13} \rfloor + \lfloor \frac{1000}{13^2} \rfloor$  do the same for  $326!$  and  $674!$  and you'll find that ...

Imagine I asked 1000 1000 people to choose a number between 0 0 and 999 999 (both inclusive, the numbers are not biased, they will be completely random) and write that number down. ...

1000 1000 is the number of small cubes in the original cube. Each face of the original cube contains  $10 \times 10 = 100$  small cubes, so the effect of removing the small cubes on all six ...

For example, the sum of all numbers less than 1000 1000 is about 500, 000 500, 000. So, 168 1000  $\times$  500, 000 168 1000  $\times$  500, 000 or 84, 000 84, 000 should be in the right ballpark. 76127 ...

Find the remainder when 777 7 7 7 is divided by 1000 Ask Question Asked 8 years, 6 months ago Modified 8 years, 6 months ago

The number of bacteria in a culture is 1000 and this number increases by 250% every two hours. How many bacteria is present after 24 hours?

Number of ways to invest \$20, 000 \$ 20, 000 in units of \$1000 \$ 1000 if not all the money need be spent Ask Question Asked 2 years, 11 months ago Modified 2 years, 11 months ago

I understand that changing the divisor multiplies the result by that, but why doesn't changing the numerator cancel that out? I found out somewhere else since posting, is there a way to ...

1 If a number ends with  $n$  zeros than it is divisible by  $10^n$ , that is  $2^n 5^n$ . A factorial clearly has more 2s than 5s in its factorization so you only need to count how many 5s ...

I would like to find all the expressions that can be created using nothing but arithmetic operators, exactly eight

# 1000 wh power station factory in atlanta

\$8\$s, and parentheses. Here are the seven solutions I've found (on the Internet)...
