We are a professional company engaged in electrical automation, committed to providing customers with integrated power distribution and automation solutions for high and low voltage electrical control ...

Into the substation or outside the substation? Typically traction power rectifier transformers are not required to meet energy/efficiency transformer standards. If copper is the desired material, clearly ...

The range of control cabinets for cable networks comes in different sizes and materials and can be flexibly mounted to suit a variety of installations, whereas the cabinets for overhead-line networks ...

An additional control power supply taking energy from HV input can be installed inside APCS, so that the APCS is able to start-up also in case of dead battery and HV only is available

Railway transportation 1500V and below DC traction power cable is an important component of DC traction power supply system for urban subway, light rail and other rail transportation.

DSPM's Auxiliary Power Supply is a compact wall-mounted inverter that is designed to generate a pure sine wave, connecting to the subway track system. The input DC voltage can be between 300V to ...

In the PCH 1200W series programmable high voltage power supply are made into half 2U 19-inch cabinet. The DC high-voltage power output is available with 1000V, 1200V, 1500V, 2kV, 3kV high ...

The BORDLINE[®] M170 DC - ABB is a pre-tested Auxiliary power converter system for railway applications tailorable according customer needs auxiliary power converter system. Up to three ...

At Mingzinc, we specialize in customized modular power systems designed for demanding environments like subway infrastructure. Contact us to learn how we can support your next rail project.

1500V Communication Power Supply Cabinet for Subways

This heavy-duty enclosure securely houses a Stand By Power Supply and three (3) batteries along with equipment and cable required for fiber optic conversion and/or distribution.
