Since the game is out of early access and there probably won't be a bout of sudden 40% inflation over the next couple years, you're probably safe not succumbing to this fearmongering. ...

Not having a sale ever is part of our philosophy. In short term, they are good and bring extra money, but we are targeting long term. I believe that searching for sales is wasted time, and ...

The Djibouti Photovoltaic Energy Storage Power Station exemplifies how strategic renewable investments can transform energy economics while addressing climate imperatives.

Our certified energy specialists provide round-the-clock monitoring and support for all installed home energy storage systems. From the initial consultation to ongoing maintenance, we ensure that your ...

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

Since its release seven years ago on Steam, Factorio has been a popular game, even though it never, ever goes on sale. On the game's Steam page, it straight up has a disclaimer letting ...

Personally I'm not a fan of the inflated release price and periodic sale strategy, there's pressure to wait for a sale, and also pressure to buy the game when it's on sale before the price goes ...

I'm sure you heard about the crowds of people sitting on a pile of hundreds of games never installed, bought during Steam sales. This is the pinnacle of that behaviour.

"This is an adjustment to account for the level of inflation since the Steam release in 2016."  
Factorio is unusual among modern video games in that it has never once gone on sale.

## 40kwh solar energy storage cabinet in djibouti

Factorio famously never goes on sale. This means that the best time to buy is now, because the price will only increase.
