How do I dispose of lead acid batteries?

Do not dispose of lead acid batteries except through channels in accordance with local, state and federal regulations. This manual contains important instructions for Flooded Lead-Acid Battery Systems that should be followed during the installation and maintenance of the battery system.

What is the ideal operating temperature for deep cycle lead-acid batteries?

Ideal operating temperature for deep cycle lead-acid batteries is 25°C (77°F). Battery capacity and cycle life is affected by operating temperature. Operating at higher temperatures will reduce cycle life due to cell degradation. A cycle life reduction of ~50% for every 10°C over 25°C (77°F) is expected. Loss of cycle life is not recoverable. Ex.

Are EnerSys flooded lead-acid batteries reliable?

Proper maintenance to the battery system of this unit must be done by a qualified service technician. This is essential to the safety and reliability of your power supply system. EnerSys flooded lead-acid batteries set the benchmark for reliability and durability in flooded lead-acid batteries and battery systems. **INFORMATION THOROUGHLY!**

How do you extinguish a lead-acid battery?

ness and other serious personal injury. Always wear protective clothing and use the correct safety tools. Eliminate any potential of sparks, flames or arcing. **IN CASE OF FIRE:** To extinguish a fire in a battery room containing lead-acid batteries, use a CO₂, foam or dry-chemical extinguishing medium. Do NOT discharge the extinguisher.
