---

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage innovations that enable resilient, flexible, ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

The rapidly-growing energy storage sector supports tens of thousands of good-paying jobs through development, construction, and maintenance of storage facilities, along with jobs supporting the new ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

Energy storage projects stabilize grids powered by variable renewables, creating local job opportunities during construction and operation. Beyond direct employment, storage projects ...

To facilitate energy transfers to and from energy storage facilities, grid infrastructure will need to be upgraded and new transmission lines and electrical substations constructed simultaneously ...

The construction content of energy storage projects encompasses diverse yet essential activities, including site evaluations, design strategies, procurement, installation, commissioning, and ...

The pledge represents a more than fivefold jump in "active investments" and could enable 100% U.S.-made supply for domestic battery storage projects, the American Clean Power ...

## Actively promote the construction of energy storage projects

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...
