---

Located in Bokhol, Senegal, Walo Storage is the first battery storage project in West Africa dedicated to frequency regulation to ensure grid stability. This project marks a significant milestone for the region's ...

A snapshot of the battery energy storage landscape reveals contrasts, with a handful of nations leading a significant buildout of utility-scale battery energy storage systems (BESS) while ...

From Kenya's geothermal fields to Morocco's hydrogen plants and the Congo River's vast hydropower potential, Africa is expanding its clean energy base with large, grid-scale projects.

The project was awarded preferred bidder in 2024 under the South African Government's battery energy storage independent power producer programme. Red Sands BESS will enhance grid stability by ...

This visualization highlights the continent's battery storage pipeline, including projects that are operational, under construction, or in planning. It reveals both leading players and emerging ...

Across Sub-Saharan Africa, new solar and wind installations are coming online in villages, towns and industrial corridors once reliant on diesel and long transmission lines. But the way we ...

Located in Qena Governorate in southern Egypt, the project entails the design, construction, operation, and maintenance of a photovoltaic power plant with an integrated battery ...

Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in June 2025 in Cape Town. It will be ...

Egypt is on the verge of a renewable energy revolution with a landmark solar project. The country will host Africa's largest integrated solar and battery storage project, following a significant ...
