What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

Designed to house a variety of communications equipment, CUBE customers take advantage of our engineering and factory integration for complete turn-key solutions. The CUBE product line ...

Outdoor telecom cabinets integrate fans, heat exchangers, or air conditioners for intelligent temperature control, extending equipment lifespan. Outdoor installations face risks of theft or vandalism. These ...

Learn how advanced outdoor telecom cabinets enable future-proof networks by supporting evolving technologies, modular upgrades, and scalable infrastructure deployment.

For non-standard orders, only the cabinet frame needs to be designed, and standard components can be assembled to complete the non-standard design, significantly reducing the non-standard design ...

Learn about their features, including weatherproofing, temperature control, and space optimization, making them ideal for outdoor installations in remote locations and urban settings.

Through the intelligent energy management system, the power status is monitored in real-time, and the power supply is automatically adjusted to maximize the stability and reliability of the system and ...

Engineered for efficiency and flexibility, these cabinets are ideal for telecom base stations, smart energy networks, and industrial control sites, where both power and communication systems must operate ...

This outdoor battery cabinet is highly customizable and designed for telecom, power, and solar energy storage applications. It offers flexible configuration in structure, materials, cooling, ...

IoT integration transforms outdoor communication cabinets into intelligent systems. These cabinets monitor environmental factors like temperature and humidity in real time.

Westell offers secure, weather-tight outdoor network enclosures to protect electronic equipment for outdoor telecom networks.
