Delivering up to 1 gigawatt of baseload power every day generated from renewable energy, the UAE's latest project will be the largest solar and battery energy storage system in the world.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

This \$7.5 billion infrastructure project demonstrates how cutting-edge energy storage technology can transform urban power systems while creating new opportunities for international collaboration.

This project is planned to start in April 2022, and will be commercial in December. By then, it can provide clean electricity for Thai people with constant power, help improve the overall ...

Sungrow, an inverter solution supplier for renewables, has agreed to cooperate with Super Energy, a leading renewable energy provider, to build Southeast Asia's largest battery energy storage system ...

This graphic highlights the top 20 battery storage capacity markets by current and planned grid capacity in gigawatt hour (GWh).

Projects such the joint venture between Stellantis and CATL could speed up the uptake of LFP batteries in the region, improve Europe's battery ecosystem and potentially reduce the cost gap ...

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been ...

Thailand's PDP 2018-2037 contains an ambitious target to build an additional 18,176 MW of renewable energy capacity during 2018-2037. This includes a target for an additional 10,000 MW of solar power ...
