We have extensive manufacturing experience covering services such as battery enclosures, grid energy storage systems, server cabinets and other sheet metal enclosure OEM services.

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

Microgrids can offer the best of both worlds, adding an integrated layer of clean on-site generation, battery storage, and controls to serve the twin purposes of reducing everyday electricity costs while ...

Specializing in renewable energy storage since 2005, we deliver customized lithium-ion and flow battery systems for Bolivia's unique terrain. Our partnerships with local lithium producers ensure cost ...

This paper presents a hybrid renewable energy-based AC microgrid system integrating a diesel generator, solar photovoltaic (PV), wind turbine, and battery energy storage to enhance power ...

With 40% annual growth in solar installations and ambitious plans to expand wind power capacity, Bolivia faces a pressing need for advanced energy storage systems.

The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa.

The inevitability of energy storage has been placed on a fast track, ensued by the rapid increase in global energy demand and integration of renewable energy with the main grid.

With microgrids becoming the Swiss Army knives of energy infrastructure, the AC-coupled energy storage system with fireproof design is stealing the spotlight. But what makes this tech combo the ...
