Why is Buenos Aires investing \$540 million in energy storage?

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more flexible, reliable, and sustainable energy future for Argentina - and potentially, a blueprint for the entire region. What role will energy storage play in your country's energy transition?

Does Argentina have a battery energy storage system?

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program.

Does Argentina have a battery storage tender?

Argentina has opened a \$500 million battery storage tender aimed at adding 500 MW of new energy storage capacity in the Buenos Aires metropolitan area. The AlmaGBA program, managed by CAMMESA, offers long-term contracts with fixed payments and financial guarantees to attract developers.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

The Government awarded the contracts for the "Alma-GBA" bidding process, aimed at incorporating electric energy storage systems in the Buenos Aires Metropolitan Area (AMBA), where ...

Argentina's 1.3 GW battery storage tender marks a transformative leap toward grid resilience and clean energy leadership in Latin America.

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid.

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more flexible, reliable, and sustainable energy future for ...

The farm will have an installed capacity of 111 MW and will be capable of generating 500 GWh of clean energy per year, enough to supply 128,200 homes. With an investment of USD 140 million, it is ...

The Argentine Renewable Energy Chamber (CADER) is set to formally update its institutional name to explicitly include energy storage among its strategic priorities. While keeping its ...

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical ...

Argentina has opened a \$500 million battery storage tender aimed at adding 500 MW of new energy storage capacity in the Buenos Aires metropolitan area. The AlmaGBA program, ...

As Buenos Aires accelerates its transition to clean energy, advanced energy storage systems are becoming the backbone of reliable power distribution. This article explores how lithium-ion batteries, ...

Summary: Buenos Aires has launched an ambitious energy storage policy to modernize its grid and integrate renewable energy. This article explores the policy's framework, its impact on industries like ...
