The project, Burundi's first grid-connected solar development by an independent power producer, is expected to pave the way for further foreign investment into the country's renewable energy sector.

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses.

Installing the first solar panels at SWAA Burundi HIV care centre in Bujumbura. UNDP and the Global Fund partner to address critical energy gaps and strengthen essential health services ...

This power station is the first grid-connected solar project developed by an IPP in Burundi. It is also the first major electricity generation investment in the country, in the past 30 years.

7.5MW solar PV power plant in Mubuga, Burundi, will improve the energy supply of nearly 90,000 people, while providing 300 temporary and 50 permanent jobs.

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected ...

This power station is the first grid-connected solar project developed by an IPP in Burundi. It is also the first major electricity generation investment in the country, in the past 30 years. The renewable energy infrastructure was on the books since 2016. Attempts were made to start construction in 2018, but the process aborted. In January 2020, construction started in earnest. Despite delays attributed to the COVID-19 pandemic, the power installation was commercially commissioned i...

Built through a multinational effort, the pioneering 7.5 MW solar PV plant near the village of Mubuga has been in operation since May 2021 and now provides over 10% of Burundi's electricity, ...

The pioneering 7.5 MW solar PV plant has increased Burundi's generation capacity by over 10%, and is the
