Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony,plugging in profits from a big battery. ITP Renewables was engaged by EKU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system,which will begin powering one-third of Canberra households from 2025.

Will Canberra get a big battery project?

Canberra is set to become host to two big battery projects,with the ACT government announcing that two companies that will supply additional 200MW of wind power to the national capital at record low prices will also both build big batteries within the ACT.

What is the Big Canberra battery?

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future. For technical specifications of our work on the Big Canberra Battery, or to discuss engaging us on similarly ambitious battery storage projects, please contact our team.

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

ITP Renewables was engaged by EKU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin ...

The Big Canberra Battery project has reached another milestone. A transformer was delivered to the Williamsdale construction site this week. The transformer makes sure the electricity ...

Canberra solar battery cabinet project progress

"Through the Big Canberra Battery project, the ACT Government is building a network of batteries across the Territory to help future-proof our energy system." Minister Orr said that the new ...

The Fadden and Dickson energy storage systems have been installed and are expected to be operational by the end of November 2025. This pilot project received funding from the Federal ...

In collaboration with Evoenergy, the ACT government is rolling out the second phase of its community-scale battery storage initiative, backed by a capital investment of AUD \$1.5 million.

Last summer, Canberra's solar farms curtailed 18% of potential output due to grid limitations. The storage project acts like a "power reservoir," capturing excess daytime solar energy for evening use ...

This allows renewable energy to flow to homes and business across Canberra when demand is high and solar generation drops. Construction is now underway on concrete bases for the ...
