China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility ...

An aerial drone photo taken on Nov 13, 2025 shows an offshore photovoltaic project in Dongying city, East China's Shandong province. [Photo/Xinhua] China's installed solar power ...

China's wind and solar power installed capacity totaled 1,840 GW at the end of 2025, according to data released by the National Energy Administration yesterday.

China installed a large 315 gigawatts (315,000 MW) of new solar photovoltaic (PV) capacity, shattering global records and cementing its position as the world's largest solar energy market. This ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold temperatures and...

In 2020, China saw an increase in annual solar energy installations with 48.4 GW of solar energy capacity being added, accounting for 3.5% of China's energy capacity that year. 2020 is currently the ...

China's solar panel installations surged in the first half of the year as developers sought to complete projects before the new policy, which removed a guaranteed rate of return, took...

In the first half of 2025, the country installed more than twice as much solar capacity as the rest of the world combined, accounting for 67% of global additions.

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout

China installs solar on-site energy

has its challenges. Here's what we can learn
