-----

A new energy storage plant featuring sodium-ion and lithium batteries has opened in the Yunnan province of China.

This station integrates the storage advantages of lithium and sodium batteries, broadening application scenarios for sodium-ion battery storage in China and accelerating the ...

China launches world's first grid-forming sodium-ion battery storage plant The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a global first, ...

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central China's Hubei province on June 30, the ...

China just fired up a next-gen battery hub blending lithium and sodium in its latest energy leap. On Sunday, its first lithium-sodium hybrid energy storage station began operation,...

Storing clean energy generated by solar and wind has long been a challenge. Sodium-ion batteries, with their low cost, enhanced thermal stability, and long cycle life, are an attractive alternative.

While lithium dominated 87% of 2023's battery market, sodium-based solutions now claim 18.5% annual growth - the fastest in energy storage history [7]. But what's driving this shift, and how is China ...

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's ...

On May 25, China's first large-scale lithium-sodium hybrid energy storage station -- the Baochi energy storage station developed by CSG -- was officially put into operation in Wenshan ...

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come
