The Chinese government has introduced new export controls on key dual-use items, citing national security concerns. The move opened a new chapter in the ongoing trade ...

China's Ministry of Commerce and the General Administration of Customs announced on October 9, 2025 that a new set of export controls will cover select lithium-ion batteries, cathode and ...

The Suspension Decision means there is now a one-year window (until 10 November 2026) during which exports of lithium-ion batteries, artificial graphite anode materials, and related ...

China's proposed export ban appears to be part of a larger strategy to maintain its leadership in the sector. By limiting global access to these technologies, China may be solidifying its ...

China's new rules, effective Nov. 8, 2025, cover export of high-performance lithium-ion batteries, cathode materials, graphite-based anode materials, and associated production...

China's proposed export restrictions on key battery technologies spark concerns over global supply chains while driving efforts toward resilience. Batteries form the backbone of the global ...

China is preparing to tighten the flow of critical materials used in energy storage. The Asian giant, which currently dominates the global lithium-ion battery market, is set to introduce major ...

Chinese government licenses are now needed for the transfer of eight key technologies for manufacturing EV batteries outside of China. China controls most of the world's lithium ...

China tightens export controls on lithium batteries and graphite materials, reshaping the global EV and energy

China stops using lithium-ion batteries for foreign solar-powered communication cabinets

storage supply chain.

Industry insiders indicated that the suspension involves high-performance lithium-ion batteries, battery manufacturing equipment, and key raw materials (such as artificial graphite, ...
