Who is DC-PV decentralized photovoltaics?

DC-PV Decentralized Photovoltaics is an engineering company specialized in solar photovoltaic energy. With national and international photovoltaic projects, this Portuguese company has become a reference in the sector. DC-PV offers EPC service (Engineering, Procurement and Construction) for the implementation of solar photovoltaic projects.

Does Portugal have a solar potential?

While Portugal's revised National Energy and Climate Plan (NECP) and Long-Term Strategy for Carbon Neutrality (LTS) have raised targets for decentralised solar photovoltaic (PV) capacity, they remain below the country's solar potential.

Why is energy sharing a problem in Portugal?

Energy sharing initiatives allow for collective self-consumption (CSC) and renewable energy communities (RECs), but licensing delays hinder implementation. Portugal's legal framework accommodates energy community definitions, yet lacks comprehensive enabling structures, raising concerns over oversight and abuse.

Does Portugal impose VAT on surplus electricity?

At the end of 2022, Portugal published the Decree Law 85/2022, exempting natural or legal persons from the payment of VAT and taxes associated with the sale of surplus electricity from self-consumption electricity production units with an installed capacity equal to or less than 1000 euros per year.

Portugal's legal framework accommodates energy community definitions, yet lacks comprehensive enabling structures, raising concerns over oversight and abuse. Financial support through ...

The outdoor photovoltaic energy cabinet can provide reliable monitoring systems, photovoltaic, and battery systems. It is a unified power supply platform system that supports various AC and DC input ...

Our team is prepared to design and implement battery projects for Photovoltaic Plants connected to the electricity grid, as well as systems for energy storage and backup of industrial facilities.

The outdoor photovoltaic energy cabinet can provide reliable housing for network servers, edge computers,

professional equipment, monitoring systems, photovoltaic, and battery systems.

Flexible Expansion: Designed to support off-grid switching and photovoltaic energy charging, making it ideal for use in a wide range of environments, including commercial buildings, residential ...

The Cevain Outdoor Cabinet System combines solar PV, battery storage, and smart energy management in a single compact unit. Built for outdoor use and designed to handle harsh ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

As solar photovoltaic and wind power installations become more prevalent, the need for robust, weatherproof, and highly reliable outdoor cabinets to house sensitive DC microgrid components has ...

Outdoor Cabinet Energy Storage System (ESS) for High Efficiency: The system supports photovoltaic and energy storage in combination with charging solutions, providing a flexible and scalable ...

The DC cabinet is made of aluminum alloy and zinc-aluminum-deposited steel plate, and the surface is sprayed with plastic, which is environmentally friendly and corrosion-resistant. The ...
