Where can I find a constant climate cabinet catalogue?

Consult ESPEC's entire Constant Climate Cabinet catalogue on DirectIndustry. Page: 1/8

Why should you use a binder constant climate chamber?

BINDER constant climate chambers are also suitable for performing long-term stability testing, as well as accelerated tests and stress tests in line with the ICH guidelines. The process parameters can be documented in a tamper-proof way using the network-enabled BINDER APT-COM software.

What temperature / humidity should a KBF pro be tested at?

Demanding material tests, typically at 85 °C and 85 % relative humidity (THB test = temperature humidity bias), are no problem with the KBF PRO series with expanded temperature / humidity range of -20 °C to +100 °C and 10 % to 98 % RH.

How are constant climate chambers used to perform aging tests?

Constant climate chambers are also used to perform aging tests. Aging tests are carried out in two different ways: in real time and accelerated. Accelerated aging tests are used to simulate the real-time aging of medical devices at shorter timescales.

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.

Constant climate chambers are available in different sizes and with different temperature and humidity ranges. Before purchasing, you need to consider in detail the applications for which you need the unit.

Continuous PID regulation, using SSR solid state relay as heating actuator, safe and reliable, with a separate over-temperature protection system.

The SIMN XHH Series represents the pinnacle of precision environmental control technology, combining advanced temperature regulation with intelligent humidity management in a compact cabinet design.

# Constant Temperature and Humidity Type Communication Cabinet for Guinea Oilfield

Temperature Humidity Chamber can accurately set and control temperature and humidity, simulate a variety of complex and extreme temperature and humidity environmental conditions, and control the ...

Climatest Symor™; Temperature Humidity Chamber capacity ranges from 50L to 1000L, Temperature Range: 0°C to +100°C. Humidity range: max.20% to 98% RH. We also provide customized chambers ...

With their highly efficient refrigeration system and outstanding thermal insulation, ESPEC's constant climate cabinets are ideal for use in laboratories and research facilities.

Whether your testing is for R& D, shelf life, accelerated aging or steady-state testing, our constant climate chambers provide a stable, temperature/humidity conditioned environment for worry-free ...

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

The six-model lineup includes 105- and 206-liter models available in four temperature (humidity) ranges and two sizes. All models support a single phase power...
