Does Costa Rica export solar panels?

The U.S. continues to grow slightly every year, even in a depressed market that slowed after new the VAT was implemented. Exports from Costa Rica are also of imported products from other countries. Most companies selling solar systems are assembled Asian solar panels with some U.S. made components.

Can a company sell solar panels in Costa Rica?

Most companies selling solar systems are assembled Asian solar panels with some U.S. made components. In 2016, the Costa Rican government approved a new regulation which allows individuals and companies to produce solar energy (up to 15 percent of the users per district) and sell up to 49 percent of their excess production back to the grid.

Are there private solar companies in Costa Rica?

There are many private companies, most of them members of ACESOLAR (Costa Rican Solar Energy Association), and the CDG (Chamber of Distributed Energy Generation of Costa Rica). They have changed the current legislation opening the market and allowing more solar panels and batteries to be installed.

Do solar importers pay taxes in Costa Rica?

At the governance level, the new legislation leaves environmental and energy stewardship in the Minae, as is now the case. Most solar product importers do not pay import taxes, but when applied, taxes can also be exonerated by the end-user through the Costa Rican Ministry of Finance.

This will open opportunities for shared solar, microgrids, and collective energy storage--areas where Canadian companies can provide design, engineering, and turnkey systems.
