Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took place for the ...

Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and energy independence.

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia.

KIISA, ESTONIA - February 3, 2026 - The Baltic Storage Platform (BSP) - a joint venture between Baltics leading renewable energy developer Evecon, French independent solar ...

Estonia's Tartu Energy Storage Power Station exemplifies how battery storage systems stabilize grids overwhelmed by solar and wind energy. With 47% of Estonia's electricity now coming from ...

This project, in partnership with energy company Sunly, involves a massive expansion of the existing solar farm with a state-of-the-art Battery Energy Storage System (BESS), creating one of ...

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh, putting ...

This article explores the project's goals, technological innovations, and how it addresses grid stability challenges while supporting Estonia's 2030 green energy targets. Learn why this project matters for ...

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia.

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test

Estonia solar power storage project

for grid-scale battery viability in northern climates.
