What is Solarstone doing in Estonia?

Solarstone is reinforcing Estonia's commitment to sustainable energy solutions by opening Europe's largest solar roof factory to produce 14 times as many building-integrated solar roofs as Tesla in the U.S. The factory can assemble 13,000 integrated solar panels per month.

What is a Solar Tiled Roof?

A Solar Tiled Roof is a system that combines solar and roofing functionality into a perfect energy production system without compromising the visual appearance of your home. The building-integrated modules for tiled roofs interlock with nearly all concrete and clay tiles, leaving your home as beautiful as it ever was. Solar Tiled Roof is for homeowners looking to harness solar energy in an aesthetically pleasing way.

Why should you choose Solarstone's solar tiled roofs?

Solarstone's solar tiled roofs are a cost-effective and modern choice. Solarstone offers prices that are competitive with conventional on-roof solar installations. Installing a Solarstone's Solar Tiled Roof is easy and efficient, with a simple gabled 60 m² roof being completed in just 1 day.

Can Solarstone's be installed on a sloped roof?

Solarstone's solar modules can be installed on all types of sloped roofs with a minimum angle of 18 degrees. This is necessary to ensure water-tightness of the installation. Solarstone says goodbye to costly mounting systems.

It's the perfect blend of traditional roof tiles and cutting-edge solar technology. Whether you're retrofitting an older home or designing a new one, our solar tiles can be customized to meet your aesthetic and ...

Estonian startup Solarstone has developed two solar tiles with an efficiency of up to 19.5% and an operating temperature coefficient of -0.41% per C.

Traditional methods construct the solar roof twice: initially creating a "base roof" and adding a "panel top layer". But our innovative methodology is not just a revolutionary stride in sustainable building.

List of Estonian solar panel installers - showing companies in Estonia that undertake solar panel installation, including rooftop and standalone solar systems..

Estonian tile rack solar

This article explores the strengths of Estonian solar technology, market trends, and actionable insights for businesses seeking reliable solar energy solutions.

Solar panels as roofing material, often referred to as solar roof tiles or solar shingles, are an innovative solution combining both energy generation and protection for homes and buildings.

Metsolar produces unlimited variety of tailored BIPV solar panels for Estonia and other regions of EU, that are efficient, cost competitive and have exclusive design possibilities.

In this blog post, we'll delve into the key differences between solar tiles vs solar panels to help you make. Solar tiles blend seamlessly with existing roof materials, providing both energy generation and ...
