What is the European electricity action plan?

The Action Plan identifies concrete and tailor-made actions to help unlock the investment required to get European electricity grids up to speed. It focuses on implementation and swift delivery, so that the actions can make a difference in time to contribute to our 2030 objectives.

What products do we install & commission?

We install and commission all products in our portfolio, from rotating equipment like turbines and compressors to transformers and electrolyzers. The qualification process and continuous training of our engineers ensure seamless and efficient installation services, minimizing downtime and maximizing performance.

How much investment is needed for European electricity grids?

With 40% of our distribution grids being over 40 years old, and cross-border transmission capacity due to double by 2030, EUR584 billion in investments are necessary. The Action Plan identifies concrete and tailor-made actions to help unlock the investment required to get European electricity grids up to speed.

What is the European grids package?

The process leading to the final package included a call for evidence and an open public consultation which were open from 13 May to 5 August 2025. The European Grids Package aims to address the key challenges for cross-border energy infrastructure in the EU.

The potential of HTS cables for the highly efficient transmission of large quantities of electrical power means that they are viewed as a possible replacement for the conventional high voltage cables that ...

With only one single-phase or three-phase input, these PDUs guarantee reliable power distribution for equipment with small and medium-scale energy requirements integrated into rack cabinets.

This European Telecommunication Standard (ETS) has been produced by the Equipment Engineering (EE) Technical Committee of the European Telecommunications Standards Institute (ETSI).

To further strengthen network planning, in line with the Action Plan for Affordable Energy, the European Commission will put forward the European Grids Package by the end of 2025. The ...

European Communication Power Supply Rack 30kWh Commissioning

ower racks that are meant to be user-friendly can easily grow in complexity. EA Elektro-Automatik's 15U and 24U height DC racks have a power range from 30 kilowatts (kW) up to 120 kW while the large ...

As part of the European Green Deal, the Commission published a Grid Action Plan (COM/2023/757) in November 2023. It highlighted that electricity consumption in the EU is expected ...

The Power Station Pro (PSP) is an all-in-one energy solution, fully certified (UL9540, UL9540A) and designed to offer up to 30 kWh of reliable battery storage.

Part 4 covers the engineering requirements for subracks in miscellaneous racks and cabinets. This document applies to all telecommunications equipment forming part of public telecommunications ...

During critical installation and commissioning, we offer the highest level of original equipment manufacturer (OEM) expertise. With experienced technical and operational personnel, our field ...

The equipment concerned should be developed in such a way that the power supply specification is observed at a physical point, located between the rack input and the power cabling of the ...
