---

The new EU Battery Regulation aims to make the battery value chain more sustainable. To support this goal, the JRC contributed to the preparation and negotiation of the Regulation and will continue to ...

Here, to explore the impacts of the EU's proposed recycled content (RC) targets on battery material circularly, we develop a comprehensive material flow analysis model for the EU's ...

o Addresses safety of stationary battery energy storage systems (SBESS), both consumer products and grid energy storage  
o Safety of other batteries is already addressed by:  
o vehicle type-approval ...

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

In this guide, we break down the EU Regulations for Battery Energy Storage Systems, highlight key compliance requirements, and provide a practical roadmap for companies preparing for ...

Explore the top lithium-ion battery manufacturers driving Europe's energy transition in 2026. This guide highlights leading players--EVE, CATL, Saft, VARTA, and Lyten--alongside key factors ...

The EU Battery Strategy is a strategic imperative for several reasons, including economic growth, reducing technological dependence and ensuring European sovereignty, as ...

The most common batteries used in uninterruptible power supply (UPS) systems are VRLA and Li-ion batteries (of which several sub-types exist). Lead-acid batteries have the highest ...

The comprehensive analysis provides a quantitative framework for understanding the energy flows associated with large-scale battery cell production in Europe. We highlight processes ...

# European union energy storage lithium-ion batteries

As part of the EU Green Deal and building on the Strategic Action Plan on Batteries, the European Commission proposed in 2020 a new regulation on batteries and waste batteries, enacted ...
