Why is a solar power plant important in the Gambia?

H.E. Corrado Pampaloni, Ambassador of the European Union to The Gambia, stated that this solar power plant is particularly important for the Gambia as it is part of the 'Gambia Electricity Restoration and Modernization Project' and contributes to a swift transition towards solar power and clean energy supply across the country.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years. The new 23 MWp solar plant will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Does the European Investment Bank support a new solar plan in Gambia?

Mr. Ambroise Fayolle, Vice-President at the European Investment Bank (EIB), stated that he is delighted that the European Investment Bank is supporting this new solar plan with such economic and social impact for populations in Gambia, particularly in rural areas.

What is the current energy generation capacity of the Gambia?

The Gambia's current generation capacity is 98 MW. Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase this capacity.

The initiative, unveiled during a pre-bid meeting, signals a major leap in the country's ambitions toward universal access to energy, renewable energy integration, and energy ...

In alignment with this commitment and with financial support from TRAC II, the UNDP Gambia Country Office is planning to install a solar PV mini grid in one rural community.

Gambia's Ministry of Petroleum and Energy, alongside the National Water and Electricity Company (Nawec), has announced a request for qualification (RFQ) for developers interested in the first phase ...

To achieve these objectives, The Government of The Gambia undertakes to take all necessary measures to address bottlenecks identified across the power value chain, in accordance with the ...

Gambia s 20MWh Solar Energy Storage Cabinet Government Procurement

The project's development objective is to support the government of The Gambia (GoTG) in piloting the implementation of a sustainable solar and battery energy storage system (BESS) ...

Gambia's government and the West African Power Pool (WAPP) have launched a process to find consultants for a 150-MWp solar project with a 20-MWh energy storage option.

To ensure a procurement system that is efficient, effective, economical, fair and participatory based on a platform of continuous capacity building, improvement and coherent procurement legislation.

Increasing investment into clean and reliable renewable energy for The Gambia is a top priority of the government. Due to its strategic location and ideal conditions, The Gambia is ideally suited for ...

To ensure sustainability, a three-year operations and maintenance contract (O& M) has been signed as large scale solar PV is entirely new to the sector.

These interventions have allowed for increased employment opportunities for these beneficiaries, particularly in renewable energy-related roles across the public and private sector in ...
