Where is Georgetown solar located?

Georgetown Solar Inc. is developing a 230-megawatt (MWac) solar project located 11 kilometres south of Carseland, Alberta in Vulcan County. The Project encompasses 700 acres (400 soccer fields) and has been sited on privately owned cultivated farmland.

Does Georgetown University have a solar energy plan?

Through a 15-year power purchase agreement, the university has pledged to purchase 100,000 megawatt-hours of electricity annually from these solar plants. This commitment not only helps Georgetown University reduce its carbon footprint but also demonstrates its support for renewable energy sources.

Does Georgetown University have a solar farm?

Georgetown University has taken a significant step towards sustainability by collaborating with several solar farms along the East Coast. Through a 15-year power purchase agreement, the university has pledged to purchase 100,000 megawatt-hours of electricity annually from these solar plants.

What is the Georgetown project?

The Georgetown Project began development in 2020 with land securement and the initiation of environmental assessments. We are committed to sharing information about the Project and working with the local community to ensure that we receive and understand stakeholder feedback and concerns.

This display tracks the output of solar arrays that contribute to Georgetown's long-term, cost-effective energy portfolio. Click on the links to see how their total output compares to customers' energy usage ...

The project would pair a solar PV plant of up to 230MWac/278MWdc with up to 200MWh of battery storage sharing the site and interconnection to the grid. Approval was granted to a ...

The Georgetown Project marks the first of four Alberta projects of Westbridge to receive power plant and BESS approval from the AUC. The approvals allow Georgetown to construct and operate the Project, ...

Another critical aspect of the project is its potential to enhance grid resiliency in the Greater Georgetown area. The battery storage system could help reduce the duration of power outages, particularly ...

Georgetown solar energy storage power

Westbridge Renewable Energy Corporation announce that its wholly-owned subsidiary, Georgetown Solar Inc., has secured financing to fund its AESO contribution requirement for its ...

Westbridge Energy Corporation is developing the Georgetown Solar Project under the name Georgetown Solar Inc. The 230 mega-watt solar plus battery storage project is being developed in ...

The Georgetown Energy Storage Project continues to make waves in renewable energy integration, achieving 92% operational efficiency in its latest phase. As cities worldwide seek sustainable power ...

Georgetown Solar Inc. ("Georgetown") filed applications with the AUC for permission to construct and operate the 230-megawatt Georgetown Solar Power Plant, a 200-megawatt-hour ...

Westbridge Renewable Energy Corp. develops best-in-class, utility-scale solar PV projects. The Company has a portfolio of projects in three key jurisdictions, Canada, the U.S., and the UK.
