How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Can a solar power system lower your electricity bill in Georgia?

On average, a solar power system in Georgia can lower your electricity bill and pay for itself over time. Below you can see power generation, cost, and savings of different system sizes. Go Solar for less than your cell phone bill. Purchasing solar panels is no small task. Here are a few ways you can pay for solar:

Does Georgia have a solar tax credit?

Georgia does not offer a solar tax credit. The levelized cost of power from a typical solar system installed on a home in Georgia over 25 years is 5.2 cents/kWh. The average cost of utility power over 25 years (if you don't get solar) is 20.4 cents/kWh.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.
