The power sources developed by Aixcon PowerSystems are used in various applications with no limits to the user. A modular and modifiable system is adapted to custom input and output sizes tailored to the user's needs.

From initial consultation to detailed system calculations and custom recommendations, our team of experts ensures that you receive the most efficient and effective DC power supply solution for your application.

Find rack mount DC power supplies for ATE, EV, and industrial test systems. Scalable, programmable, and ready for automation with remote interfaces.

We manufacture custom power supplies for industrial, medical and LED lighting applications, telecommunications and media technology, building systems technology and the transport sector.

CAMTEC engineers and manufactures Switch Mode Power Supplies SMPS and assemblies for the Automation Sector, Machine Building and Electronics Industry. The product range comprises AC/DC converters, DC/DC converters, and power supplies.

The GENH family of programmable power supplies sets a new standard for flexible, reliable, AC/DC power systems in OEM, industrial and laboratory applications. Highest power density available: up to 100W/l.

Our DC laboratory power supplies are divided into four series, with each series aimed at one area of application. Please follow this selection menu (click on the image) for more information and prices on our website.

PULS Group specializes in the development and production of DIN rail power supplies, offering a broad range of high-efficiency and reliable products, including AC/DC and DC/DC converters.

RSG Custom Power Supplies, 100% made in Germany - featuring high-performance power electronics, DC/DC-Converter, Quarze und Oszillatoren.

Germany Communication Power Supply Rack DC Customization

Smart control and diagnostics of the power supply as well as communication with your CAN, CANOpen or EtherCAT bus system. We build first prototypes, test them and provide them to you. The ...
