Is IP55 suitable for outdoor use?

IP55 is suitable for areas where complete dust protection is not needed and water exposure is limited to light showers or splashes. IP55-rated devices are sufficient for many indoor, or even partially outdoor, uses where the threat of water exposure is not significant.

Do you carry IP55 enclosures?

We carry IP55 enclosures that demonstrate almost complete protection from particles and a good level of protection against water. All of our enclosures rigidly adhere to the guidelines, so you can count on outstanding and cost-effective enclosures. Refer to the chart below for the IP55 standard protection specifications and ratings:

Are IP55 and IP65 rated enclosures suitable for external use?

A: Yes, both enclosures rated IP55 and IP65 are suitable for external use. These enclosures are protected against ingress of dust and water jets, making them suitable for a wide range of indoor and outdoor uses. However, harsher outdoor environments may be suited to IP65 rated enclosures as it offers higher protection.

Why is IP55 protection important?

4. Compliance with Standards: The IP55 rating is a recognized standard, ensuring that the enclosures meet the necessary requirements for protection against dust and water spray. In conclusion, the IP55 protection rating is a critical factor to consider when selecting electrical enclosures and equipment for various applications.
