Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions offer remote ...

Utilizing high-efficiency, water-to-water heat pumps coupled with a ground source heat exchanger, an energy recovery system, solar PV arrays, a high-performance building envelope, etc., ...

Developing all-electric, geothermal heat pump fire stations in Beacon and Ithaca represents a significant step forward in sustainable design and climate action within New York State.

Firefighters arrive at the scene of a fire, and then identify the solar system on the structure, shut it down, watch for hazards as they extinguish the flames, and make sure the scene is safe when they leave. ...

Fire departments around the country are choosing to design "green" elements into their new or remodeled fire stations - from the use of sustainable materials and taking advantage of ...

Our design was optimized so the opportunity for capturing additional energy savings from ultra-high efficiency (costly and often higher maintenance cost) HVAC equipment and renewables ...

The utility model provides a photovoltaic fire station to overcome the defects in the prior art that the fire station relies on a fixed power source as a power source and the operation...

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and ...

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation - Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and ...

High-efficiency photovoltaic cabinetized fire station

The new facility replaces the original station built in 1971 that was designed to house a single engine company with living quarters for one firefighter. Designed and installed by SolarCraft, the solar ...
