We can provide users with full-scenario lithium battery systems, and provide customized lithium battery solutions to high-end users. Click the link below to download technical documents

Meet YD/T 1537-2015 outdoor cabinet standard, cabinet protection level: IP65 protection level. The cabinet supports 19-inch standard racks, and supports the installation of various devices that meet ...

EK photovoltaic micro-station energy cabinet is an integrated intelligent energy storage device designed for distributed energy scenarios, providing 10-50kWh multiple capacity options (models: EK-Micro-10 ...

The Cabinet offers flexible installation, built-in safety systems, intelligent control, and efficient operation. It features robust lithium iron phosphate (LiFePO₄) batteries with scalable capacities, supporting on ...

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions offer remote ...

The product is compatible with wall-mounted and cabinet-type PCS installation. The standardized unitized design makes the product be flexibly configured according to actual application scenarios.

The photovoltaic storage and off-grid integrated cabinet adopts an ALL-in-One design, integrating battery PACK (including BMS), photovoltaic controller (MPPT), PCS, on-grid and off-grid switching ...

Through the combination of advanced LiFePO₄ batteries with smart battery management and compact design, it offers safe, reliable, and scalable energy backup for mission-critical applications.

From energy storage system design to installation and maintenance, we offer a comprehensive "turnkey"

High-efficiency photovoltaic integrated energy storage cabinet for emergency rescue

industrial and commercial energy storage service that effectively addresses issues such as ...

This fully integrated energy storage system features a comprehensive all-in-one design, incorporating essential switches for battery fuses, photovoltaic input, utility grid, load output, and diesel generators.
