Monitor real-time electricity generation in Cyprus. View live data on solar, wind, conventional power production and grid status.

Each year Cyprus is generating 262 Watts from solar PV per capita (Cyprus ranks 19th in the world for solar PV Watts generated per capita). [source] Are there ...

According to estimates from energy analytics platform CyprusGrid, total renewable energy additions in the country reached 134 MW during the year. Solar power accounted for most of this ...

Solar power in Cyprus benefits from over 3,300 hours of sunlight annually, giving it the highest potential in the European Union (EU). [1] At the end of 2025, Cyprus had 957 MW of solar power, of which 300 ...

In contrast, low-carbon or clean energy sources contribute to more than a quarter of the electricity consumed on the island, with solar power being the major contributor at approximately 21.74%. Wind ...

The solar power sector in Cyprus has made notable strides in recent years. In 2021, solar energy generation reached 468 GWh, contributing 9% to the total energy production of 775 GWh ...

Cyprus is a global leader in per capita solar power capacity, with approximately 632 watts per person. Solar power installations in Cyprus have helped reduce CO2 emissions by over 200,000 tons ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...

With optimal conditions, a 30W panel generating power for an average of five hours per day can produce around 150 watt-hours. This performance can fluctuate depending on sunlight availability, ...

How many watts of solar power does cyprus generate

Cyprus: Solar electricity generation, billion kilowatthours: The latest value from 2023 is 0.85 billion kilowatthours, an increase from 0.6 billion kilowatthours in 2022. In comparison, the world average is ...
