How much does a server rack cost?

A full rack averages 3-5 kW or \$300-\$1,000 monthly. Hence, high-performance environments using 10-20 kW of power may spend between \$1,000 and \$4,000 each month. ServerMania's Montreal colocation facility, powered by 99% renewable energy, offers one of the lowest power costs in North America, making it ideal for energy-efficient operations.

How do I calculate the cost of a data center rack?

Our calculator does it for you. Simply choose one of our data center rack hosting options or enter your current colocation costs, fill the power input and the price of electricity per kWh. The result will be the total monthly cost associated with the rack or server space rental, connectivity and power consumption.

How much does server colocation cost?

Single server colocation is popular for businesses seeking secure server hosting in a data center environment. Server colocation typically costs between \$79 and \$599 per month, depending on the provider and colocation cost requirements. Full rack deployment costs may include charges for space, power requirements, and bandwidth usage.

How much does a server cost per month?

The power efficiency also affects your monthly fee, as high-density servers draw more energy, which increases your overall power consumption. A 1U server typically uses 200-400W per month, costing around \$20-\$80. A full rack averages 3-5 kW or \$300-\$1,000 monthly.

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and ...

No need to manage your own IT infrastructure, we offer colocation or dedicated server rack rental in our green data centers in Northern Europe! Colocate your servers, network devices, and storage ...
