What is an IP54 server cabinet?

An IP54 server cabinet from Lehmann IT offers excellent protection for your IT equipment against all external influences. In our range, you will find a wide selection of different models - from a simple wall-mounted enclosure to complex industrial cabinets. What are the benefits of an IP54 server cabinet?

What is IP54 & how does it work?

A Complete Guide to Electrical Enclosure Protection IP54 is one of the most common ingress protection (IP) ratings used for electrical guide cabinets, industrial enclosures, and outdoor equipment. It defines a specific level of defense against dust and water, based on the international standard IEC 60529.

Why are IP54 enclosures used as traffic control cabinets?

IP54 enclosures are commonly used as traffic control cabinets among other applications because of its superior ability to protect the electrical equipment from splashing water or rain conditions from any directions as well as protection from tampering from any solid object aside from a non-harmful deposit of dust.

How much protection does an IP54 server cabinet need?

For an IP54 server cabinet, a degree of protection of 4 provides good protection against splashing water. Since server cabinets are not submerged, this degree of protection is usually perfectly adequate. Splash water protection is particularly useful for industrial use. An IP54 server cabinet can be a perfectly sensible purchase for many sectors.

We offer enclosure cabinets with IP54 rating for industrial applications. Protect your IT from dust and splash water with racks from SCHÄFER IT-Systems. Call +49 2741 283-770

IP 54 Inorax-AL rack cabinet system offers the best solution for IT and Telecom applications in harsh environmental conditions where dust and water protection is required.

Versatile and configurable wall-mount cabinets to protect network equipment.
