India has set a target to achieve 50 percent cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by 45 percent ...

The Central Electricity Authority (CEA) has released a report titled "Roadmap to 100 GW of Hydro Pumped Storage Projects (PSPs) by 2035-36", outlining a strategic pathway for scaling up ...

India has set a national target to meet 4% of its electricity demand with energy storage by 2030, translating to around 200-250 GWh of grid-scale storage capacity (Ministry of Power Order, 22 July ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

NLR's energy storage readiness assessment for policymakers and regulators, summarized on this page, identifies areas of focus for developing a suite of policies, programs, and regulations to enable ...

Formulation of comprehensive National Energy Storage Policy and necessary guidelines to guide the development and deployment of Energy storage systems in India.

India has released a national roadmap targeting the development of 100GW of pumped storage hydropower capacity by the 2035-36 financial year, positioning pumped storage as a central ...

India's solar and energy storage sector enters 2026 with unprecedented momentum. This in-depth SolSetu analysis explores policy shifts, project execution realities, financing trends, and what ...

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...

India energy storage power station planning

Developed a detailed Energy Storage Roadmap for India for deployment of different ESS technologies with timelines under various scenarios of VRE and EV penetrations
