The roadmap outlines India's strategy to rapidly scale up pumped storage capacity to ensure grid stability, integrate variable renewable energy sources such as solar and wind, and provide long ...

This project will enable the storage and supply of up to 6 hours of renewable energy. This milestone strengthens ENGIE's role in India's ambition for round-the-clock renewable power, with ...

Driven by ambitious 2030 renewable energy targets (500GW non-fossil capacity) and growing grid stability needs for variable solar/wind, India is rapidly tendering renewable energy (RE) ...

Steel manufacturer ArcelorMittal is investing INR81 billion (US\$903 million) in three renewable energy projects across three states in India. The investment includes a 36MW solar plant ...

India's solar and energy storage sector enters 2026 with unprecedented momentum. This in-depth SolSetu analysis explores policy shifts, project execution realities, financing trends, and what ...

With a commitment to developing tailor-made, multi-technology solutions, Zelestra put forward a bespoke solution that meets SJVN's needs delivering 24/7 green energy. Zelestra will also ...

The top 10 projects of 2025 are not merely infrastructural developments--they represent India's unwavering resolve to lead the clean energy transition on a global scale.

India has a very large potential for Pumped Storage Projects (PSPs) across both on-river and off-river schemes. At present, India's pumped storage potential is estimated at around 267 GW, ...

As of June 2025, India's installed energy storage capacity stands at 490 megawatt-hours (MWh); of this, 56% is solar-plus-storage systems, followed by 32% solar-plus-wind projects, 12% from standalone ...

India wind solar and energy storage project construction

Ongoing Projects Solar PV ... Wind Energy ... Small Hydro Power ... Waste to Energy ... Hydrogen Energy
