How far should a power dispenser be from the power cabinet?

This optional communication method allows locating the Dispenser farther than with Ethernet connection. Power Electronics recommends a maximum distance between the power cabinet and the Dispenser of 80 m (262.46 ft) with Ethernet communication and 150 m (492.13 ft) with optional fiber optic communication.

How do I connect a power cabinet to a dispenser?

Exit from power cabinet to Dispenser. Recommended cable size: 2 x 2.5 mm² / 2 x 14 AWG. Maximum cable diameter: 7 - 10 mm² (cable gland M16). Output connections from power cabinet to other power cabinets and towards the Dispenser can be either Ethernet + optical fiber or optical fiber. Optical fiber (GOF): For power control communications.

What type of cable do I need for a power cabinet?

Output connections from power cabinet to other power cabinets and towards the Dispenser can be either Ethernet + optical fiber or optical fiber. Optical fiber (GOF): For power control communications. Recommended cable size: duplex multi-mode OM3(50/125 micron) 2 x SC Connectors.
