The revolutionary ATC cabinet combines the best of rack mount and serial-based designs to meet the needs of today's intersections. Using smarter, high-density components, the cabinets offer advanced ...

As a pioneer in intelligent transportation solutions, Econolite sets the standard for traffic control cabinets and traffic signal cabinets. These cabinets power the next generation of smart intersection technology.

These enclosures house and protect critical traffic control hardware--ensuring seamless communication, system reliability, and ease of maintenance. From advanced controller cabinets to ...

Rugged communications that keep you movingSiemens solutions can:Traffic - constant, ever-growingTimely information - stay one step aheadUrban communications systemsUrban traffic control - benefits:Interurban communications systemsRoad tolling - benefits:Siemens offers:Bridge and tunnel communications systemsSiemens offers:Security informationGrowing populations mean more vehicles on the road. More vehicles mean greater congestion, longer commutes, and an even more pressing need for timely traffic data. From large cities to smaller communities - the challenges continue to increase. See more on [assets.new.siemens](#) Orange TrafficConnected Traffic Cabinets System - Orange Traffic inc.Managing intersection controllers is costly and time-consuming. The Applied Information connected traffic cabinet system allows you to wirelessly monitor, ...

The intelligent design of the ITS cabinet series provides ample space and convenient modularity for numerous applications. In addition to traffic control, the ITS cabinet is perfect for sign control and ...

Managing intersection controllers is costly and time-consuming. The Applied Information connected traffic cabinet system allows you to wirelessly monitor, maintain and communicate with your signal ...

Bridges and tunnels require highly available, integrated network communications. Addressing increasing regulatory and safety requirements, Siemens offers communications solutions designed specifically ...

Intelligent Communication Cabinet for Canadian Bridges

The ATCC uses high-speed serial communications, providing modern features, advanced diagnostics, enhanced safety, simplified traffic control cabinet wiring, and reduced traffic control cabinet size.

Each ATC Cabinet is designed to provide Safer, Smarter, and Greener intersections. This intelligent traffic control cabinet design is based on the most popular features of Safetran's Caltrans, NEMA, ...

The ATC cabinet combines the best of rack mount and serial-based designs to meet the needs of LED intersections. Using smarter, high-density components, the cabinets offer unparalleled control ...
