The Iranian government is seeking to make it mandatory for all of its departments to use off-grid solar systems to meet their electricity demand.

The Iranian government is embarking on an ambitious initiative to transition all government buildings to off-grid solar energy systems. This move aims to alleviate electricity ...

If you're a government or large enterprise seeking utility-scale solar farms, companies like Iran SolarTech and Tabriz Solar offer extensive project portfolios and robust operational capacity.

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining 480 MW will be installed over the next 18 months in ...

To address this challenge, the Iranian government recently announced a significant energy transition plan: all national government agencies will gradually disconnect from the national ...

The Iranian government has unveiled a sweeping energy transition initiative to decouple all state institutions from the national power grid, prioritizing off-grid photovoltaic (PV) systems to ...

Many solar firms have described Iran as a tough country to do business in, so putting up the first ever large-scale plants came with some unique challenges.

By turning to its abundant solar resources, the government aims to alleviate pressure on its conventional power plants, reduce domestic reliance on fossil fuels, and improve overall grid stability.

SATBA pushes forward construction of 1,000 solar power plants in Iran to reduce grid losses, boost stability, and attract private investment.

Iran s off-grid solar cabinets with ultra-large capacity

This large-scale solar project is expected to significantly reduce greenhouse gas emissions and shrink Iran's carbon footprint. By shifting away from fossil fuel-heavy industries, the ...
