In Japan's latest long term decarbonisation power source auction (LTDA), battery energy storage systems (BESS) have emerged as a clear winner in this category.

Japanese financial services group Orix is set to build one of the country's largest power storage facilities, partnering with Tesla Inc. for the supply of industrial-scale batteries.

This project marks Hitachi's first delivery of a grid energy storage system in Japan. The entire process—from design and procurement to installation and testing—was seamlessly managed as ...

A large-scale battery energy storage system is required in Japan to address electrical power output fluctuations destabilizing the supply and demand balance, and to expand the use of renewable ...

Japan's expanding data center industry and the growth of digital infrastructure are driving up energy demand, spurring the adoption of innovative green solutions such as battery storage ...

Here, we will delve into our path taken to launch a completely new business and start operation of the first large-scale energy storage facility in Japan in 2024, as well as the challenges and future ...

Japan's largest renewable battery energy storage system (BESS) project has broken ground in Kyushu under developers, Osaka Gas and Sonnedix.

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan.

Construction of Hirohara BESS started in September 2024 and the battery is expected to begin operating in early 2027. Once live the BESS will be capable of storing enough electricity to power ...

Tesla's Megapack is set to play a pivotal role in Japan's growing renewable energy infrastructure. The tech

Japan s 600kW Energy Storage Unit

giant has been selected to provide grid-scale energy storage for one of ...
