-----  
What happens if a battery is transported by a shipper?

This can lead to short circuits, fires, explosions, and the production of toxic fumes. Shippers are required to understand and comply with the applicable regulations for the transport of batteries by all modes of transportation.

Can batteries be shipped by air?

Damaged, defective or recalled batteries are forbidden for air transport. However, batteries having some other defective feature (e.g., batteries with the incorrect model number on the label or batteries not holding enough charge) can still be shipped by air with proper packaging, labeling and documentation.

Why are batteries important for transportation?

Batteries provide a unique risk when offered for transportation. They provide a power source for numerous items such as computers, phones, automobiles, and life-saving equipment.

A UPS guide to help you safely pack and ship many kinds of batteries including lithium metal, damaged or defective batteries and alkaline or certain nonspillable lead-acid batteries.
