Do you offer packaged substations?

To complement our transformer supply, we offer fully integrated packaged substations. Utilising industry-leading solutions, we stock a comprehensive range of MV switchgear and LV cabinets that can be close-coupled to transformers or free-standing. Our options include a packaged solution fully procured by us or free-issued by the customer.

What is a compact secondary substation?

is a Compact Secondary Substation solution designed for large scale solar power generation. The CSS consists of a type-tested assembly of MV switchgear and a transformer in an enclosure, usually installed as close to the solar strings as possible, enabling an option for ease of service - Separate access entries to MV and transfo

What is a package substation?

This high voltage power supply is usually fed from a Distribution Network Operator (DNO) owned and operated sub-station or as stated above a site-owned HV Network, depending on the situation. A Package Substation is a fully integrated close-coupled system, which can save time, space and money when compared to a de-coupled system.

We are a leading UK supplier of containerised transformer and switchgear substations, switchboards & switchrooms from LV distribution up to 6.6kV, 11kV, 20kV & 33kV.

Here is a price estimate for standard compact substations based on rated transformer capacity. Please note that actual costs may vary depending on customization, country of origin, and included features.

Regardless of your needs, we will work with you to create a custom package substation solution that is right for your business. We have a wealth of experience working in different industries, so we ...

Our substation packages range from extended modular enclosures with an internal transformer and external RMU, through to containerised substations in 20-40ft containers.
