What is the future of power generation equipment in Mexico?

The market for power generation equipment in Mexico is estimated to increase 1.05 percent from 2022-2023, while exports from the United States to Mexico are expected to increase 0.93 percent.

What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

What is the national power system in Mexico?

Mexico's National Power System (Sistema Eléctrico Nacional or SEN) is one of the largest in the Western Hemisphere. It is comprised of nine regions, plus a binational electricity system in Baja California. Most of the nine regions are interconnected, forming the National Interconnected System (Sistema Interconectado Nacional or SIN).

How much electricity does Mexico use in 2022?

According to Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN), the electricity consumption of the National Electricity System was 333,662 GWh in 2022, which represented an annual increase of 3.4 percent.
