In Micronesia, Yap island seeks bids on a 79 kW solar plus storage minigrid system. A new hybrid minigrid that will provide clean, reliable and efficient energy supply to residents of Tonga was ...

But that's about to change. Woleai, part of the Federated States of Micronesia (FSM), is working to restore its solar energy system through a collaborative effort that brings together local ...

The state-owned electricity supplier in the Federated States of Micronesia, Yap State Public Service Corporation (YSPSC) has invited bidders to deploy solar PV minigrids in Yap, a remote island in the ...

A total of 10 feasibility studies are being carried out across 10 separate islands in the Chuuk group of the Federated States of Micronesia. These studies will determine the best way to ...

The Asian Development Bank (ADB) and the government of Micronesia today inaugurated one wind park near Yap's only urban centre -- Colonia, and a grid-connected solar power system that was ...

Micronesia is remote, so it's going to be a strong candidate for using solar, primarily because there is demand for electricity and the other major option is diesel, which is expensive.

An off-grid solar system is a stand-alone power solution that enables you to generate and store electricity without relying on the traditional power grid. This energy independence is particularly ...

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas ...

The ARISE Project will address this issue by funding solar-powered mini grids and stand-alone solar home systems on four unelectrified islands in Chuuk--Moch, Onoun, Tol-Wonip, ...
