What are outdoor telecom enclosures?

Outdoor telecom enclosures are structures designed to protect and house telecommunications equipment outside. They come with a range of options including cable management, thermal management, environmental protection, and integration. All these solutions and enclosure products can be custom-made. KDM relies on custom and standard NEMA standard telecom cabinets to protect their internal equipment.

What are NEMA rated outdoor Telecom enclosures?

NEMA-rated outdoor telecom enclosures are cabinets that meet specific application requirements to withstand outdoor elements. They come in various NEMA standards such as 3, 3R, 4, 4X, and 6. Our telecom outdoor cabinets are factory tested, field proven, and worry-free.

Why should you choose a KDM outdoor telecom enclosure?

A KDM outdoor telecom enclosure protects your telecommunications equipment outdoors and withstands outdoor elements such as temperature extremes, dust ingress, ice, shock hazards, and UV damage. It also safeguards against moisture, condensation, chemicals, and corrosive gases that can affect sensitive components within.

What accessories are included in an outdoor Telecom cabinet?

An outdoor telecom cabinet from KDM includes enclosure fans and power options. Depending upon the installation location, KDM also offers an optional built-in air conditioner or heat exchanger.

It provides an ideal solution for securely housing outdoor telecommunications, transmission systems, power devices, monitoring equipment, lithium batteries, and other essential components.

We will perform a DFM analysis on your design and aim to provide a quote within 2 hours. Rapid manufacturing will expedite the production of your products, with turnaround times as short as 7 days.
