Discover a range of 800mm wide x 800mm deep data cabinets and racks from leading brands at Comms Express. Optimise your data centre with high-quality cabinets and racks designed for efficient space ...

To determine the ideal depth for your server cabinet, begin by measuring the total depth of your deepest piece of equipment. You'll want to include rear cable clearance and airflow zones in ...

These 800 mm wide cabinets are available in several heights and depths. They provide flexible ways to mount servers, patch panels, routers, and other sensitive electronic devices reliably and securely.

Because of the modular inserts the cabinet provides optimal flexibility. The cabinet is equipped with leveling feet adjustable up to 38mm and is fully earthed via a central earthing point.

Features: connected by four corner to ensure the stability; cable entry from the top cover and bottom panel; removable side doors for easy installation and maintenance. Read more!

Our cabinet is easily assembled for quick installation and contains heavy-duty locking casters for movement and leveling feet for usage when the fully racked cabinet must remain in place. This ...

Our cabinet is easily assembled for quick installation and contains heavy-duty ...

The Giganet 42U Cabinet is packed with features designed to simplify rack equipment installations and rack equipment maintenance: top and bottom cable routing ports, perforated door and side panels to ...

The NavePoint Commercial Series cabinets come pre-assembled for easy setup and include pre-installed heavy-duty locking casters for mobility, and leveling feet for use when the fully racked ...

Normally, the highest depth that the equipment can be placed should be aligned to the internal depth of the

Network cabinet 800mm depth adjustment

cabinet when the brackets are placed furthest away from each other.
