-----

We are the leading developer of community-scale battery energy storage systems (BESS) in the New York City metropolitan area.

The power supply guarantee system for base stations, with its new energy lithium batteries featuring high energy density, light weight, long cycle life and environmental friendliness, ...

Connecting powerhouses of battery advancement across New York state. Our network of universities, business incubators, training resources, testing and prototyping facilities in N.Y. makes the future of ...

Thanks to this 16-member coalition, NENY has created many foundational programs to boost upstate New York's battery and energy storage ecosystem, from promoting workforce development to ...

Together, we're combining KEEN (the Khasm Enterprise Edge Network) -- a portable private 5G and edge compute platform -- with NUE's rugged solar + battery power systems, ...

An open market intelligence platform for clean energy research, focused on the battery value chain. Our expansive data library and interactive dashboards empower your research in just a few clicks.

Enabling users to remotely monitor, configure, and optimize their smart lithium battery systems, the Battle Born™; Mobile App works exclusively with products featuring Dragonfly IntelLigence™; technology.

NineDot Energy developed this battery site in the Bronx. The company broke ground in 2021, unveiled the site with a ribbon cutting in 2022, and went live in 2023.

New Energy New York's coalition and program mission is to meet the demand for U.S. battery products by accelerating the battery research, development and manufacturing ecosystem in Western, Central ...

## New energy battery communication site

Here, the authors introduce LiDFTFB, a new salt that exhibits improved stability and enables high-energy batteries to retain 81.7% capacity after 650 cycles at 50°C.
