In Minas Gerais, the Enel Group's Arinos Solar Park is born: a project that is reshaping Brazil's energy landscape, creating jobs and sustainable social value.

The projects combine solar, wind, and battery storage to address the challenges of variable production and ensure stable power supply--demonstrating how technology can accelerate ...

Brazil's National Interconnected System (SIN) registered a new solar power generation record when the country's solar farms hit 37,869 MW on March 14, the Ministry of Mines and Energy ...

Explore new solar projects in Brazil that will add 340 MWp of capacity to the grid and reduce CO2 emissions significantly.

Home and building owners installed more than 3.7 million renewable distributed generation systems in Brazil as of June 30, 2025.

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed generation encounters...

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

The year 2026 is shaping up to be a landmark period for Brazil's renewable energy sector. A powerful combination of groundbreaking infrastructure projects, forward-thinking policy initiatives, ...

Casa dos Ventos, which has developed one of every four wind power facilities in Brazil and has about 35 GW of renewable energy deployed in the country, will utilize equipment from U.S. ...

New renewable energy solar sites in brazil

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy ...
