What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

How much storage capacity does Seb Nordic energy have?

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's Ostrobothnia region, the project is expected to be completed in 2026.

What is the largest energy storage park in the Nordic region?

Romina Pourmokhtari, Sweden's Minister for Climate and Environment, officially inaugurated the largest energy storage park in the Nordic region. The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh.

Why is the Nordic region a key energy storage provider?

With existing interconnections to the UK, Germany, the Netherlands, Poland, and the Baltics, the Nordic region already serves as a key energy storage provider for the rest of Europe. Many Nordic hydropower plants are upgrading their control systems to improve its responsiveness.

It is an honor to inaugurate the largest energy storage investment in the Nordic region. Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling ...

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics.

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy development, a new structural necessity is emerging in the energy system: the ...

Scheduled for construction in the fall of 2025, the facility will consist of two of Monsson's signature 10 MWh battery units, optimized for cold-weather performance and reliable operation in ...

Nordic accelerates the construction of new energy storage

As the world races toward decarbonization, Sweden's new energy storage technology is turning heads globally, blending Nordic pragmatism with breakthroughs that even Elon Musk might ...

Richard Gavel, Portfolio Manager at SEB Nordic Energy, noted that the new battery storage project diversifies the fund's assets and accelerates the transition to sustainable energy, ...

Monsson acquired the project from Fu-Gen, a Nordic developer with a proven development history, including recent divestments totaling over 100 MW of BESS projects in Sweden ...

As energy stakeholders anticipate the completion of the Nivala-based infrastructure, the project led by SEB Nordic Energy's Locus Energy and Ingrid Capacity AB underscores emerging ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance ...
