-----  
What are outdoor Telecom cabinets?

Outdoor telecom cabinets are built to withstand harsh environmental conditions. These enclosures protect telecommunication equipment from rain,dust,extreme temperatures,and unauthorized access. They are commonly used in remote locations,such as cell tower sites,roadside installations,and industrial areas.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers,server rooms,and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors,they do not require extensive weatherproofing.

How do I choose a telecom cabinet?

The environment where your telecom cabinet will be installed plays a crucial role in your decision. Outdoor installations require cabinets with advanced weatherproofing features, such as UV-resistant coatings and waterproof seals. These features protect your equipment from harsh weather conditions.

What is inside a telecom cabinet?

Inside a telecom cabinet,you will find mounting racks and shelvesdesigned to organize your equipment efficiently. These racks provide a structured layout,making it easier to install and access devices. Adjustable shelves allow you to customize the setup based on your specific needs.
