-----

Circuit protection solutions for battery packs comprise a combination of several devices, which are crucial design considerations during charging and discharging of the battery pack.

[Protect Your Power] - The Slimline 21700 battery case is made of a soft durable rubber like material which will not crack or shatter. It keeps your batteries fully protected by keeping both ...

Diodes" AP9101C is a protection solution developed for lithium-ion and lithium- polymer rechargeable batteries with a high-precision voltage detection circuit.

Our vast product lineup provides strong support for developing safety-critical battery packs with secondary protection and other features to suit customer needs such as smaller, lighter, and thinner ...

The battery protection circuit disconnects the battery from the load when a critical condition is observed, such as short circuit, undercharge, overcharge or overheating.

Master lithium battery safety with protection boards and BMS. Learn how to select the best board for your device.

See how our flame retardant foam tape improved EV battery pack cushioning, reduced vibration damage by 40%, and supported safer electric vehicle assembly.

High cell count lithium batteries are attractive due to high energy density but require basic protections at a minimum. More advanced protections may be needed depending on the application.

That is why we design our battery protection ICs to detect a variety of fault conditions including overvoltage, undervoltage, discharge overcurrent and short circuit in single-cell and multi-cell ...

Fralock offers custom component solutions for battery modules and battery packs. Solutions include thermal
