How has the electricity market changed in Panama?

The dynamics of the electricity market were also overhauled, creating a wholesale market including daily generation capacity spot markets. In 2016, Panama approved the National Electrification Plan (PEN) 2015 - 2050, which aligns with Panama's climate goals and involves significant scale-up of green energy sources.

What is Panama's national electrification plan?

In 2016, Panama approved the National Electrification Plan (PEN) 2015 - 2050, which aligns with Panama's climate goals and involves significant scale-up of green energy sources. Energy & IIT Comillas, 2024. Interviews with Coalition and government stakeholders, 2025.

Who manages electricity distribution in Panama?

Electricity distribution in Panama is managed by three companies: ENSA, EDEMET, and EDECHI. The Panamanian State owns 49% of the shares in these distribution companies, while Naturgy holds 51% in EDEMET and EDECHI, and Empresas Públicas de Medellín (EPM) owns 51% of ENSA.

How did Panama's hydropower development change in the 1990s and 2000s?

The 1990s and 2000s saw privatization of these assets and changes in both energy market structures and regulation. Sources: Panama's hydropower development defined by fierce resistance and tough choices, Circle of Blue, Schneider, 2015.

In an exclusive interview with pv magazine, Panamanian Energy Secretary Juan Manuel Urriola said the government will open the electricity market to private investment and revise ...

Honduras Power Generation and Energy Storage Project This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once ...

Among various grid services, frequency regulation particularly benefits from ESSs due to their rapid response and control capability. This review provides a structured analysis of four ...

A representative model of the power grid of the Republic of Panama was optimized considering generation, demand, the national grid, and the use of an energy storage system.

# Panama power generation energy storage frequency regulation project

Customers with consumption of less than 300 kWh are eligible to receive a subsidy as part of the Tariff Stabilization Fund (FET). Panama also developed tariff schedules with hourly rates for all end ...

This section provides an overview of Panama's current and planned infrastructure for the generation, transmission and distribution of electricity, as well as to aid the supply of fuels to the electricity ...

Commercial battery energy storage systems - ranging from few to hundreds kW - provide peak shaving, load shifting, emergency backup and frequency regulation to a grid helping improve power quality ...

The list of projects includes generation-side, behind-the-meter, and grid-side applications, as well as thermal-generation-bundled energy storage for frequency regulation.

Overview of electrification in the country, including history, current status, geographic & demographic trends, and future plans. The geospatial plans are not government-endorsed roadmaps. They are ...
